EXPERIENCE

Mainstreethost

Amherst, NY

Web Developer

10/2018 - Present

- Designed and developed websites focusing on strong optimization and functionality
- Worked on projects including web layout enhancements, website enhancements, and web based applications
- Collaborated with clients to determine best strategies to ensure goals were successfully met
- Assisted in shaping company's web accessibility initiative and policies

People Incorporated

Amherst, NY

Network Support Specialist

04/2017 - 10/2018

- Network administrator for the Wide Area Network; managed network, phones and other systems interfacing with the network
- Mentored and trained help desk technicians
- Served as a Mimecast administrator to protect against malicious email coming into the agency

Help Desk Support Specialist

- Received, prioritized, documented, and actively resolved end user technology-related questions and requests
- Performed hands-on fixes at the desktop level for both hardware and software related issues
- Managed agency iPads through the Meraki Mobile Device Management

TECHNICAL PROJECTS

EZ Golf Scorecard - Github: [Front End](#) | [Back End](#) | [Demo](#)

A mobile focused golf scorecard application allowing users to create, edit, read, and delete golf scores and track statistics over time

- Utilized React and React Router to build out the front end of the app
- Built the back end (RESTful API) to manage data using Ruby on Rails and a Postgres database
- Styled the front end with a small custom component library and SCSS resulting in a clean user experience
- Integrated Auth0 for user authentication and authorization for app security

GTA Online Vehicle Information - Github: [Front End](#) | [Back End](#) | [Demo](#)

A full stack app that shows information about vehicles for the game GTA Online

- Utilized React, React Router, and Styled Components to deliver a simple user facing interface
- Used Node.js, Express.js, and Postgresql to build out the back end/API

The Accumulator Game - Github: [Front End](#) | [Demo](#)

A silly game that allows users to expand and upgrade businesses and "buy" real world things

- Built in Vue, Vuex, SCSS, and deployed on Netlify to deliver a performant and enjoyable user experience
- Utilized flexbox for responsive design allowing for a positive user experience across device types

EDUCATION

Flatiron School

Manhattan, NY

Full Stack Web Development, Ruby on Rails and JavaScript program

03/2020 - 07/2020

Canisius College

Buffalo, NY

Bachelor of Science degree in Management Information Systems
